PROFESSIONAL SUMMARY

Detail-oriented BCA Data Science graduate, currently pursuing an MCA, with hands-on experience in data cleaning, exploratory data analysis (EDA), and dashboard development using SQL, Python, and Power BI. Skilled at translating raw datasets into clear, actionable business insights and eager to apply strong analytical and problem-solving skills in an entry-level Data Analyst role.

TECHNICAL SKILLS

- Languages: Python, SQL, R, Java, C
- Data Analysis & Visualization: Pandas, EDA, Data Cleaning, Data Visualization, Time Series Analysis, Power BI, Excel
- Databases: MongoDB, SQL
- Machine Learning: Machine Learning, Deep Learning, Pattern Recognition, Computer Vision
- Tools & Platforms: Power BI, Excel, VMware, Git

PROJECTS

Scholarship and Subsidy Tracking Website

- Improved transparency in scholarship fund distribution for student applicants, as measured by a reduction in manual tracking errors, by designing a centralized web-based data platform to log, clean, and monitor subsidy records.
- Streamlined data entry and retrieval workflows, as measured by faster access to applicant records, by structuring a relational database schema to organize scholarship and subsidy datasets.

Movie and Web-Series Review Platform

- Increased user engagement with content discovery, as measured by the ability to browse and filter titles efficiently, by building an interactive database-driven website for movie and series reviews.
- Enabled structured storage and quick querying of user ratings and reviews, as measured by consistent data retrieval accuracy, by designing and managing the underlying MongoDB database.

Smart Wiper System (IoT + Data Analysis)

- Improved automated decision accuracy for wiper speed control, as measured by real-time responsiveness to changing rain intensity, by analyzing sensor data streams and applying pattern recognition logic on a microcontroller.

VIRTUAL EXPERIENCE & TRAINING

Deloitte Australia — Data Analytics Job Simulation

Forage | (Month, Year)

- Built an interactive Tableau dashboard using factory telemetry JSON data to analyze machine downtime patterns across multiple production facilities.
- Isolated critical maintenance bottlenecks by identifying specific equipment (e.g., laser welders and cutters) that accounted for the highest operational downtime.
- Implemented nested conditional logic in Excel to create an equality classification index based on disparate demographic metrics.

EDUCATION

MCA (Master of Computer Applications), Presidency University, Bengaluru

2026 – Present

BCA in Data Science, Presidency University, Bengaluru

June 2023 – June 2026

CGPA: 7.85

CERTIFICATIONS

- SQL for Data Science — Great Learning
- Deep Learning for Developers — Infosys Springboard
- MongoDB Tutorial — Great Learning
- VMware vSphere Mastery — Udemy

EXTRACURRICULAR / LEADERSHIP

- Improved sample shopping cart design efficiency by 60% through UX and workflow analysis.
- NSS Unit Leader — Organized National Youth Parliament and Road Safety Awareness campus events.
- Cricket, U16 KSCA City Division (Karwar City) — developed leadership and performance-under-pressure skills as an all-rounder.
